

Privacy screen with integrated cable duct

	SKU (Art. No.):	SiS1.1-19253-7016.8
	Cable duct:	1-fold / Ø 1 cm
	Material:	Soft PVC, UV & weather resistant
	Connection Method:	welded
	Thickness:	450 gsm
	Quantity:	8 pcs x 2.53 m
	Total length:	20.24 m
	Height:	19 cm
	Color:	RAL 7016 - anthracite
	Mounting brackets:	16 pcs.
	Cable:	Not included
	Cable dimensions:	Ø max. 10 mm
	For fence types:	ideal for bar mesh fences Picket systems (with a minimum mesh height of 20 cm)
	ISO Certificate: ISO9001:2015 GB/T19001-2016	
		
		
LUCID No.: DE2897179728869		
		

Product Description:

This patented privacy strip is designed in such a way that cables or electrical cables can be pulled through the intended cable duct.

It makes it possible to visually extend cables without the additional effort of having to bury them or lay them dangerously on the surface of the floor. Of course, the outlets can be determined individually.

The cable ducts are inconspicuous. This is important for alarm systems, cameras...

Our system consists of high-quality, ISO-certified PVC fabric strips that are UV and weather resistant. The high-quality welding ensures additional protection of the cable.

USPs

- Easy installation
- Infinitely expandable
- Suitable for the use of different cables:
e.g. for electric gate operators, solar elements, bell systems, lighting, cameras, ...
- Cable outlet possible at any desired length.
